

Dive-In's *GO-PRO* PADI Materials Checklist

PADI Standards stipulate that you must own all the relevant PADI materials for each course you undertake. If you do not have any of the below listed materials for your chosen program then purchase them now and benefit from huge savings, using our home delivery option allowing you to start studying now!

All *GO-PRO* Candidates must complete their studying prior to arrival at the College.

We are able to offer special packages to all candidates which can save you up to 40% on normal retail prices.

Not only do you save money when purchasing these packs, but you are assured of having the most up-to-date materials for your courses. Remember that PADI is a dynamic organization at the forefront of diver education, therefore changes occur within the PADI System on a regular basis and some of your older materials may not be current.

If in doubt, contact us with the product code of your materials (usually located on the inside front or back cover) and we will check this against the latest version.
